

Java:Practice & Assignments

Software Engineering Lab
Dept.of CSE, IIT Kharagpur

Lab 1 & 2: Prototype Using C

Develop a prototype of the project assigned to you using C. Try to implement as many features of the concerned system as possible. Additionally, try to identify other possible characteristics of the said system.

Submit your assignment with all the relevant source files and any other resource files, if relevant. In case several files need to be compiled, please provide the compilation instructions in a README file.
